VENTILATION SYSTEMS THAT SIMPLY WORK

VENTUVA brings fresh, healthy air into your home: quietly, efficiently and all year round. With up to 96.5% heat recovery, the decentralised ventilation system helps reduce heating and cooling energy consumption significantly, while supporting a comfortable indoor climate and effective mould prevention. Designed for both new builds and renovations, Ventuva is easy to install directly into the external wall.

Choose **VENTUVA Basic** for convenient control via remote, or **VENTUVA Advanced** for smart operation through the app. Modern ventilation doesn't have to be complicated – Ventuva makes fresh air simple, comfortable and accessible.

#EASY

Ideal for easy retrofitting, as no additional air ducts or complex installations are required.

#ECONOMICAL

Efficient heat recovery noticeably reduces energy consumption and helps lower energy costs.

#HEALTHY

Improves indoor air quality and protects your home from moisture and mould damage.

VENTUVA SYSTEM

TECHNICAL DATA

Wall opening	Ø 180 mm
Air volume flow	15 – 60 m^3/h
Heat recovery	up to 96.5 %
Power consumption	1.6 – 7 W
Sound pressure level	16 – 40 dB(A)*
Standard sound level difference	36 dB*
Energy efficiency class	A+ / A

*estimated values, final testing in October 2026
